Internship

Project Intern (Java Full Stack Web Development) | Q&J Spider, Navi Mumbai Apr'23- Oct'23

Key Role:

- Engaged in collaborative web application development, leveraging Hibernate with fellow intern team members to enhance the efficiency of web application development.
- Participated in all phases of development, utilizing Java technologies to customize products, add new features, and enhance existing functionality.
- Contributed in the development and implementation of a dynamic online banking system, harnessing a robust ORM solution, employing JDBC and utilizing Eclipse IDE for coding.
- Managed inquiries from 50-60 students, addressing issues related to applications and other matters.

Projects

Social Media Application:

Project Description:

- Built a secure platform using Node.js and Express.js with JWT authentication, allowing users to create posts using text and media, with role-based access and CRUD functionality enhanced by custom middleware for image uploads.
- Implemented post engagement through likes and comments, ensuring these features are tied to authenticated sessions, and optimized the platform with a modular architecture for maintainability and scalability.

Job Portal Web Application:

Project Description:

- Developed a job portal website using Node.js and Express.js, leveraging MVC architecture for organized code structure.
- Implemented features including user authentication, job posting management, file uploads, resulting in a secure and dynamic user experience.

IT Skills

- Programming Languages: JavaScript, Core Java (Basic).
- Front-End Development: HTML, CSS, JavaScript, Node.js.
- Database languages: (Basics)SQL, MongoDB.
- Back-End Development: Node.js, Express.js.
- Tools & Technologies: Visual Studio Code, MySQL Workbench, Postman, Multer, Nodemailer, JWT, bcrypt, EJS, Git.

Education

- B.E. (Electronics & Telecommunication) from Terna Engineering College of Engineering, Nerul; scored 7.2 CGPA.
